FOR IMMEDIATE RELEASE

GOLDSBORO, N.C. – Geographic Technologies Group (GTG) is pleased to announce that Tipton County, Tennessee extended their Public Mapping to include Motor Vehicle Crashes.

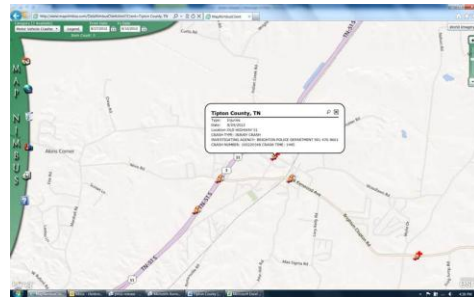

Tipton County, Tennessee implemented a public facing crime application, MapNimbus, in 2010. This application was very well received by the County and its citizens. Because of its popularity and ease-of-use, the County decided to extend the application to include calls for service and motor vehicle crashes. Bob Beanblossom, from the Tipton County Sheriff's Office, presented the application at the Tennessee Governor's Highway Safety Office Lifesaver Conference this past week. Mr. Beanblossom pointed out that the audience was very impressed with the new functionality.

To view this application visit: <http://www.mapnimbus.com>

For more information call Matt McLamb at 888-757-4222 or email mmclamb@geotg.com.

About Geographic Technologies Group, Inc. (GTG):

GTG is a full-service local government GIS consulting company offering specialized experience in the planning, design, implementation, and procurement of geotechnologies. GTG has unmatched technical GIS capabilities, demonstrated successes, international experience, and a reputation for successfully implementing the right solutions. GTG develops GIS products that spatially enable various enterprise solutions and integrates an organization's IT investment via a common interface. GTG also offers stand-alone products for land management, public safety, public access, touch screen technology, and utilities.

GTG has more than 700 clients located throughout North America and Europe and serves all levels of government as well as the private sector. To support our clients, GTG maintains four offices located across the United States: Headquarters in North Carolina, and regional offices in Texas, Florida, Ohio, and California.

Additional information may be obtained by contacting Geographic Technologies Group, Inc. at 888-757-4222 or you can access our website at www.geotg.com.
